Planned and reactive services

We are able to provide and manage a fully planned maintenance and inspection service. This will ensure your equipment performs consistently as specified. This will minimise breakdowns and inconvenience to your business operations.

Supported by our team of qualified engineers and service partners we can respond to any emergency 24 hours a day, 365 days a year.

- Stress free **planned maintenance** to save you money and keep your business operations running.
- Supported by **emergency response** 24 hours a day, 365 days a year by fully trained and qualified engineers.

Some of our clients:

Our services include:

Air conditioning systems

Maintenance is performed by our skilled team of engineers working to the latest F Gas standards. Being fully trained they are able to work on any manufacturer's equipment.

Electrical

You can rely upon our fully qualified team of electrical engineers to complete the work quickly and efficiently to your total satisfaction.

Fire Protection services

We provide qualified operatives who carry out planned preventative maintenance and service inspections on all fire protection equipment.

Heating

Our team of skilled engineers, Gas Safe and Oftec trained, will be able to maintain your commercial and domestic equipment to ensure safe operation and improved efficiency.

Water management services

You can rest assured in the knowledge that your water management systems are fully maintained and monitored at all times for water quality.

"KM Services have provided this building with a professional service and excellent technical back up for many years. I would not hesitate in recommending this company to others."

Alan Coulson, Reuters Group Fleet Street
